Announcement
Regarding *GPX4* gene-associated Skeletal Dysplasia

The parents of a child diagnosed to have Sedaghatian-type Spondylometaphyseal Dysplasia (a rare form of skeletal dysplasia caused by pathogenic variants in the *GPX4* gene) want to reach out to other families with similarly affected children. They are making attempts to develop a disease-modifying therapy for this condition. For further details please visit their website <https://www.curegpx4.org/>.
